Community Resources: A Robust File-Sharing Application

Developing custom training and compliance programs for your organization is both time consuming and expensive, especially if you have to create those programs from scratch.

With TargetSolutions' Community Resources, you now have the ability to easily share information — including training presentations, educational videos, policies, procedures, inspection forms and more — with other TargetSolutions clients and community members. Best of all, you can download, modify and assign these documents to your employees in just a few clicks of the mouse.

The benefits include the following:

Time and Money Savings
■ Community Resources provides relevant results right at your fingertips.
■ All of the content is "tagged" with appropriate topics and keywords, making it easy to locate what you need.
■ Documents are free of charge and can be shared, customized and distributed to your organization.
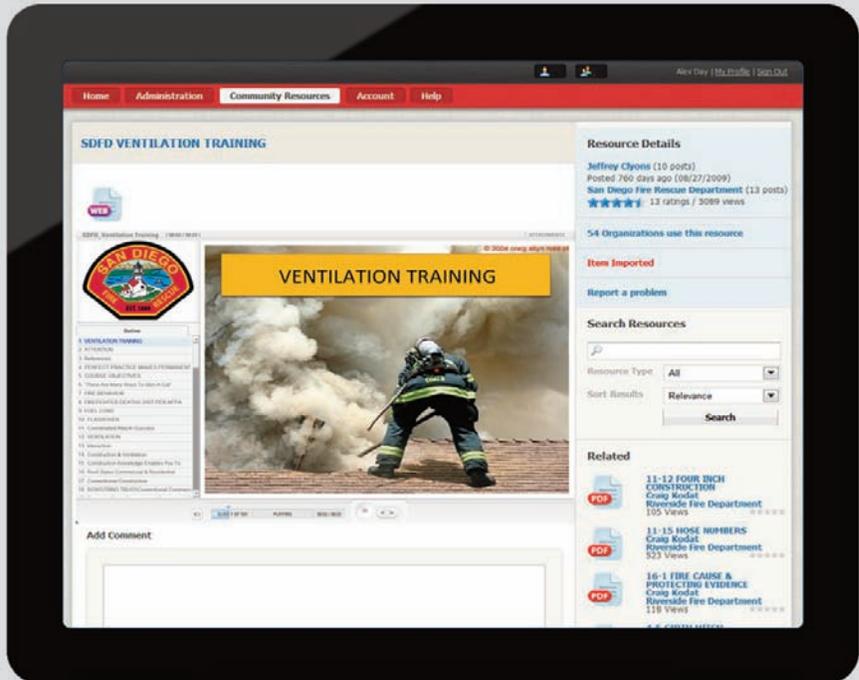

Access to Best-Demonstrated Practices
■ Community members include the nation's leading fire and EMS departments, schools, municipalities, risk pools and other public entities — providing you with centralized access to information and best practices you can't find anywhere else.
■ As a contributor, you will receive professional recognition for your organization's own best-demonstrated practices.

Information Updated in Real Time
■ Community Resources is dynamic and updated in real time.
■ The top videos and files are continually re-ranked as community members view and rate the information.

Private Resources Option
■ You can select what information you want to share and what you want to keep confidential.
■ Downloaded resources are saved in your TargetSolutions Organization Resource (File) Center to be viewed by members of your organization.
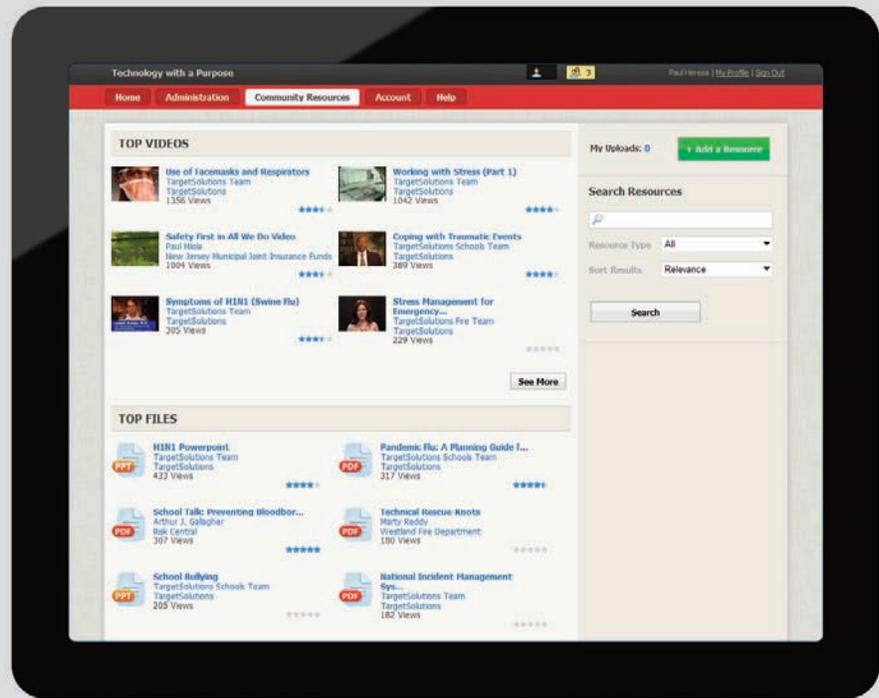

TargetSolutions Community Resources

View and Rate Resources
■ Access the resource and additional information including the resource title, type and description as well as the author's and organization's profile
■ Comment on or rate the resource
■ See a list of related resources
■ Find other resources created by the same contributors

Import Resources
■ Import any of the files, videos and other documents you find into your organization's TargetSolutions platform
■ Modify the resource, if you want, and assign it to employees using TargetSolutions' Custom Activities Manager
■ Make the resource available, as is, to all users who have access to your TargetSolutions Organization Resource (File) Center Search for Relevant Resources
■ Look for resources by typing in relevant key words
■ Use Advanced Search to locate information by resource type (file or video) and relevance (views, ratings, oldest or newest)

Upload Resources
■ Upload and share your organization's best practices and other innovative ideas (files or web pages) with community members
■ Select appropriate topics and tags (keywords) for each resource
■ View member ratings and comments on shared information

"Community Resources is a way for instructors to network and share information. If there is a program they have done that they are proud of, they can put it out there for everyone to use. They can also look at what others have done for some help. It's really a great way to share in a community setting."

EDDIE BUCHANAN,
President of International Society of Fire Service Instructors
